Each timepiece is individually hand-finished in our Geneva workshops.

The Art of Precision.

Founded in post-war Geneva by master horologist Édouard Valdor, our maison has dedicated three generations to the pursuit of mechanical perfection.

Every movement is assembled by a single watchmaker, bearing their initials on the oscillating weight — a tradition honoured to this day.

Our calibre V-24, beating at 28,800 vibrations per hour, represents the pinnacle of in-house manufacture.

*“We do not make watches.
We preserve moments.”*

— Édouard Valdor, 1952
